

Finally, a Visionary Solution to the Myopia Epidemic for Children in DuPage and Cook Counties!

Burbank, IL – Eye Care Center LTD is excited to unveil a groundbreaking approach to myopia management for kids and tweens in the DuPage and Cook County areas, including Burbank, Willowbrook, and Addison. With millions of children experiencing nearsightedness nationwide—and those numbers set to rise—it's time for a lasting solution that goes far beyond the temporary fix of glasses.

Traditional treatments often involve just a quick prescription, but our collaboration with Treehouse Eyes brings you the Treehouse Vision System™—a patent-pending, integrated treatment protocol developed by leading eye care specialists. This innovative system combines the most effective, non-invasive treatments into a single, customized plan designed to tackle myopia at its source. Because when it comes to your child's vision, why settle for a band-aid?

“Here at Eye Care Center LTD, we’re not just treating eyes—we’re shaping a brighter future for our children,” says Dr. Jasmine Carter, our Chief Pediatric Ophthalmologist. “Our partnership with Treehouse Eyes allows us to offer evidence-backed, non-invasive treatments in an environment that’s both nurturing and innovative. It’s about more than clearer vision—it’s about empowering kids to see their potential.”

In an area where a significant number of children face the challenges of myopia, our state-of-the-art centers are setting a new standard in eye care. With appointment times designed to fit busy family schedules—before school, after school, and even on weekends—advanced eye care is now both accessible and convenient for your community.
